What you're wearing now, and a big part of your current wardrobe, was born from the last century. Hippies, punks, army and Nineties skaters - these subcultures have all returned to seasonal trends lately, making a comeback from their forties, fifties, sixties and seventies induction into menswear. So, with all these bygone eras and bold fashion themes on display, how do men navigate the world of retro fashion trends? What decades have died? And what retro must-know going on in menswear right now? And who's here to stay? Everything is answered and more if you read on. Bowling shirt shorts according to Reece Crisp, menswear buying manager in Farfetch, fifties and seventies are big trends this season. But the retro trend, and the main themes that come with these decades, manifests itself in today's ways. Think bowling shirts with cropped pants and scissors jackets styled in oversized sweatshirts and track pants, says Crisp. Retro shirt Modern Jacket But before you grand of a vintage binge (or raid your grandfather's closet), it's important to develop retro pieces of modernity and stick to your personal style of weapons - no imitations. Protect the old one. It creates a more unique and individual look, adds Crisp. Make it easy and don't try to be anyone else. Essentially, run the gaze using the key items that are included. Leather jacket jeans condition vintage-look item is super important. This includes things like wash or paint an object, as well as shape or silhouette and fabric. Rocking brand new items with really worn vintage pieces is don't, warns Crisp. The statue is also the key. The silhouettes have changed dramatically, so it's important to remember that even if the denim wash is right, you get it very wrong if you're fit. Finally, making the choice to go authentic vintage - that is, the item actually worn and used to say, in the Seventies, can make all the difference. Something like a biker or scissors jacket, I would go vintage every time. As perennial style pieces they age better and have more character as they do, says Crisp. Light blue jeans Casual Wear Collectively this season, vintage denim looks a lot like light lingerie, blue jeans with a straight cut fit and slightly high waist - much like pants. Directing Americana workwear, see something like Levi's 501 jean, roomier seat and tapered knee down with modern suits. Light blue jeans are a staple for men, says Crisp. Wear them with everything except maybe with a brush like an official blazer. Cutting bomber jacket in the colder months If you only buy one jacket this year, make it a fermenting bomber. Steeped in early-century aviation and seventies cool, you don't have to go all the way to sheep's skin feel. Conjoining, especially not so hot is most versatile as a collar trim leather bomber jacket. In a real winter chill, invest in a fully lined one, keep you warm and looking cool. The beauty of the fermenter is that it's a statement in its own right. Just add a t-shirt, jeans and clean cut sneakers. Or, as Crisp insists on wearing a jacket, keep authentically retro and bold: Go Rocky style. A turtleneck sweater coat also known as a turtleneck or skivvy, rollneck sweater is one of the most polarising retro fashion items to return to the modern menswear market. But it packs a punch when worn out correctly, whereas not many guys can or want to pull it off. Rock it under a suit jacket or coat in winter. Or style it under the look shirt, and suede Harrington, says Crisp. Turn on those textures. Revere collar shirt warmer months One of the biggest summer must-haves, revere collar shirt is the perfect way to inject some Frank Sinatra-going-on-vacay into your personal style without the need for a straw fedora. Look for bold vintage prints in faded colors (sun-beaten is thinner) and wear a pro-Cuban shirt with tailored chino shorts and espadrills or linen shorts and a moccas to feel smarter. This is a great layered piece worn open over a singlet or t-shirt. And the streetwear vibe, style it over the long-sleeved path. Add some nineties starts and tapered story pants. Peak Lapel Jacket on official occasions in the twenties and thirties, the peak lapel peaked with many single-breasted suit and dinner jackets. But nowadays, the flare-ish lapel is more common than a double-breasted blazer, adding a jacket with an expansive line, and thus extending the shoulders. Practically aside, this is a statement lapel that ripped the smart casual style of Pitt Uomo in the latest edition, and won't be tipping any time soon. Go to the classic twist, says Crisp. Team in grandpa's collared shirt. Footwear? Chunky beam derbies or simple leather sand shoes. Short Swim Trunks Swimming Swimming Pants offer a blend of fun and practical this season. Just like the spring racing carnival, your swimmers should embrace the color and print way by standing out from the beach crowd and celebrating the summer. And if you have the confidence to do so, trunk styles will get shorter (but not tighter) too, this season. But within reason. Short retro trunks are only ok on the beach, says Crisp. And keep the retro boat afloat with a vintage top to match. Style with toweling tea. White sneakers with jeans White sneakers are not new. But it's the ultimate blast-from-the-past shoe and goes even further vintage this season with canvas-leather models kicking up the scene and plenty of heritage brands reintroducing classic sneakers with silhouettes. For a white sneaker, keep retro, says Crisp. Choose slim jeans, a polo shirt and a biker or bomber jacket. Super clean, retro chic.
